

★ FamilyHub is an all-in-one family platform helping modern households build stronger routines, healthier digital habits, and long-term financial resilience. The platform combines family coordination, beneficial screen time, and **embedded financial literacy through a gamified reward economy where children learn to earn · save · invest · spend through everyday family life.**

Designed to be inclusive , built around the needs of households historically underserved by family-tech, with internationally-relevant experiences such as the Ramadan journal.

Key Partners 08

ACTIVE

- **Identity and secure database** (Supabase)
- **Payments and subscription billing** (Stripe)
- **Cloud hosting** (Railway)
- **AI personalisation engines** (OpenAI, Anthropic)
- **Reliability and product analytics** (Sentry, PostHog)

POTENTIAL

- **UAE government partners:** Early Childhood Authority, ADEK, Department of Community Development (Abu Dhabi), Family Development Foundation
- **Standard Chartered Foundation:** non-dilutive capital and ecosystem
- **Faith-based schools, places of worship, homeschool co-ops:** community distribution partners
- **Apple and Google app stores:** native mobile distribution

Key Activities 07

- Product development on a 2-week release cadence
- Educational content and curriculum (Maths, Logic, World Flags)
- Family acquisition through search, paid social, and community partners
- Customer support and family success programmes
- Operating the per-child personalisation engine
- Partnership development (faith-based schools, places of worship, co-ops)
- Finance, tax, and accounting operations

Key Resources 06

- **Secure cloud platform**, built and operating today
- **Per-child learning data** , our competitive moat
- Proprietary curriculum content
- Brand and design system
- Founder team, AI-augmented
- 12-month operating runway

Value Propositions 02

- **Family admin:** calendars, meals, announcements, assignments, journal.
- **Beneficial screen time:** Maths, World Flags, Logic. Kids earn by learning.
- **Sticker economy: earn · save · invest · spend. Financial literacy from early childhood**, baked into family life.
- **Cultural and faith flexibility:** Ramadan journal, multi-faith calendar support, place-of-worship integration, extended-family roles.

COMPETITOR	ADMIN	EDU	\$\$	CUL.
Cozi, FamilyWall	●	·	·	·
Khan, Prodigy	·	●	●	·
GoHenry, RoosterMoney	●	·	●	·
Mustim Pro etc.	·	·	·	●
FamilyHub	●	●	●	●

AI moat. Per-child placement data compounds; competitor switching incurs cold-start regression.

Customer Relationships 04

- **Self-serve onboarding:** under 5 minutes
- **Lifecycle email programme:** welcome, day-3 prompt, day-14 progress recap, monthly streak report
- **Retention loops:** sticker streaks, weekly meal prompts, child learning progress
- **Enterprise customer success:** hands-on until our first five paid organisations
- **Product-led growth:** in-app behavioural cues convert free families to paid

Channels 03

- **Search and content** (e.g. “family planner app”, “homeschool app”, “multi-faith family planner”)
- **Product Hunt** launch
- **Paid social campaigns** on Meta and TikTok, focused on UAE / Saudi / UK
- **Community partnerships** (faith-based schools, places of worship, co-ops)
- **Mobile distribution:** web app today, native iOS and Android upcoming
- **Direct enterprise sales** beyond 100 paid families
- **In-app referrals:** invite-a-family, both households receive a free month
- **Branded partner portals** double as consumer surfaces

Customer Segments 01

- **Core consumer:** tech-comfortable parents with 2+ children, currently juggling multiple apps
- **Underserved consumer:** multi-faith, multi-generational, blended, and large households
- **Organisations (branded deployments):** faith-based schools, places of worship, homeschool co-ops, NGOs, government-affiliated family programmes (20 to 500+ families)

Launch geography. 1. UAE / Saudi Arabia. 2. US / Canada / UK. 3. Indonesia / Pakistan.

Cost Structure 09

LINE	TYPE	NOTES
Cloud hosting	Variable	~\$20/mo today, scales linearly with paid families
Identity and database	Variable	Free tier today, paid tier at scale
Payment processing fees	Variable	2.9% + 30¢, built into pricing
AI personalisation	Variable	Target < \$0.50 per child per month
Payroll	Fixed	Founder team, plus first hire at 100 paid families
Marketing	Variable	Cost to acquire a family stays under 6× monthly subscription revenue
Compliance and legal	Fixed	EU, US, and UK child-data regulations
Domain and certificates	Fixed	Custom domain and wildcard SSL

Cost moat. The cost of serving an additional family is near zero; per-family economics improve with every paid family.

Revenue Streams 05

CONSUMER	PRICE	INCLUDES
Household (Free)	\$0	3 members, limited features
Family	\$7.99 / \$69 yr	Unlimited members, all core + Maths
Family Pro	\$12.99 / \$109 yr	+ Logic, World Flags, custom subdomain
ENTERPRISE	ANNUAL	INCLUDES
Up to 20 families	\$299	Branded subdomain + logo
21 to 100 families	\$999	+ admin tools, member roles
101 to 500 families	\$1,999	+ reporting, bulk invites
501+ families	\$3,499	+ dedicated support, SSO

24-month target. 5,000+ paid families, 30+ partner organisations, \$720k+ annual recurring revenue. An 8-12× revenue multiple implies a \$5.7M-\$8.6M acquisition value range.
